

Cinematic Disaster: Player Units

Red = Attack Type

Blue= Defense Type

Director (Main Character)

Skill: "Action!"

0 TP cost.

Infinite PP.

Hit the closest grounded enemy with a clapboard for 1 damage.

Skill: "Cut!"

1 TP cost.

Infinite PP.

Yell with a megaphone. Hit an enemy of your choice for 2 damage. Works on both aerial and grounded enemies.

Skill: "Take 5!"

infinite PP.

For every 5 enemy attacks consecutively dodged without getting hit, gain 1 TP.

Hires:

Janitor

Skill: Disinfectant

2TP

10PP

Sprays the enemy's eyes directly with toxic chemicals. 100% chance to poison the enemy if they aren't immune.

Skill: Bucket

6PP

Makes yourself immune to poison

(Simply throw up the toxic substance into the bucket)

Casting Agent

1 TP

25PP

Skill: Scouting

Attacks the nearest enemy, deals 2 damage, and their health bar's visibility is enabled for the rest of the battle.

Set Builder

Prop Master

Celebrity Comedian

Skill: Joke about World Events

4 PP

Has 2 possible effects, based on whether the enemy finds the joke funny or not.

75%: Successful Joke. The enemy attack becomes twice as easy, and if your director currently has a status effect, pass a copy of that same effect to ALL non-immune enemies.

25%: Failed joke. The enemies are offended, and the enemy attack becomes twice as hard.

Singer

Skill: High Note

3TP

4PP

Does 4 damage normally, but deals double damage against airborne enemies.

Skill: Vocal Warmup

4PP

Note shaped pickups will appear randomly during an enemy's attack. Heal 1 HP for each one collected.

Cameraman

Skill: Security Camera

7PP

Fails on enemies that dwell in dark areas, or are too fast to capture. When successfully activated, it will keep a record of the first enemy that lands a hit on you. On the following turn, that specific offending enemy's opportunity for action will be skipped entirely.

Light Technician

Skill: Blinding Flash

1TP

12PP

Has 2 effects depending on how well lit the battle stage is. A flashlight is the primary “weapon” used.

- While well lit, only does 1 damage but has a 40% chance to stun the enemy you choose.
- While dark, deals 10 damage to the enemy you choose. Has an 80% chance to stun, and also changes the stage’s state to “well lit” immediately afterward. This makes it a fantastic “opening move” against enemies that thrive in darkness.

Skill: Rear Exposure

2TP

6PP

Use an especially hot spotlight to deal 3 damage to the enemy furthest back, and has a 100% chance to inflict them with the burn status.

VFX Guys (Costco Reference)

Skill: (Big Boom)

10 TP

2 PP

Create an explosion that deals 8 damage to all enemies. Has a 70% chance to inflict the burn status.

Foley Artist

- **Skill: (Crash Box)**

2TP

6PP

Large metal cube falls from above, making a loud car-crash like sound effect while crushing 1 enemy of your choice. Does 4 damage normally, but deals double damage against grounded enemies.

Makeup Master

- **Skill: (Mimic)**
5 TP
10PP

Change your player sprite to match the enemy you targeted. You will then hit the enemy with the exact same attack animation they normally use- and deal equal damage to that enemy's base attack strength stat. This is fixed and unaffected by stat buffs AND debuffs.

Stunt Double

11PP

- **Skill: (Risky Maneuver)**

- This is a unique and valuable shield-like unit that can only be activated in battle once per time being hired. Since it costs 1 PP to initialize, the actual utility lies in the remaining 10.

-It stays out on the field indefinitely during the battle it is used, unless the PP runs out. The player's choice of a different defense skill is automatically skipped while active.

-When the player gets hit, each time they will receive no damage but instead spend 1 PP assigned to the Stunt Double. Upon reaching 0 PP, the Stunt Double will instantly leave your team.

-If any PP still remains when the battle ends, they will still leave regardless. HOWEVER, the price of hiring Stunt Doubles in the

future will be discounted by a percentage equal to your PP remaining.

10PP from doing a no-hit fight= 10% for example.

This effect may stack during the course of a run, but caps at 50% maximum.

Extra

- **Skill: (Anything Goes)**

1TP

3PP

Very cheap to hire, and somewhat common. Activates the effects of a random attack skill OTHER than itself- while spending their OWN pp instead of the one selected.
